## Advance Termite Bait Station 20-6 Kit 2010 Pro Kit

An average size home needs at least 20 stations (picture only shows 10 stations this listing is for 20 stations with

**New bait cartridges in our 2010 pro kits now contain 33% more bait! Control more termites for longer per**

The Advanced Termite Bait System is the next generation in termite baiting. It is one of the most widely installed professional pest control companies today. Unlike older bait systems, the Advance Termite bait stations have large vertical slots for maximum wood-to-soil contact, creating the perfect opportunity for termite attack. Each station contains a wood-to-soil Inspection Cartridge of enticing Puri-Cell cullulose matrix that is very appetizing to termites. When termites are found, the cartridge is replaced with a termite bait that wipes out the entire termite colony.

The Advance Termite Bait System Pro Kit contains:

- 20 Termite Monitoring Stations that each contain a wood base and a termite inspection cartridge. These stations are placed 3 feet apart around your home.
- 6 Termite Bait Cartridges for use when termite activity is present in the stations.
- 1 Spider Access Tool for easy access to the bait stations.

This exact Kit is used by thousands of professionals including the big T and big O .. and they charge your own money.

Save Money and do it Yourself!!!

### Advance Termite Bait Station 20-6 Kit

**The 20/6 Advanced Termite Bait Station Kit** is the next generation in termite baiting kits. The station contains a Termite Monitoring Base with preferred wood that is appetizing to termites. Above this rests a wood-to-soil source, the Termite Inspection Cartridge containing Puri-Cell matrix in a clear cartridge that makes inspection easy. A Quick-Lock cap eliminates keys and hinges. The Spider access tool opens the stations easily. Our termite bait is the ideal choice for getting rid of termites from in and around your home.

125 grams of compressed Puri-Cell™ bait matrix with .25% diflubenzuron active ingredient

Treatment Technique: Bait cartridge placed in stations once termites are present in station.

Target Pests: Subterranean Termites including Formosan Termites

Advance Termite Bait Monitoring System

### Description

The Termite Bait Kits contains all the supplies needed to bait a 200 Ln. Ft. home when station placement is approx. 10 Ft. apart.

The Advance Termite Bait Station Kits aren't your typical termite bait kits available at your hardware store. This is a professional system installed by pest control companies coast to coast. This is not a dead end system. Replacement parts are available. You can purchase more bait cartridges, stations and other kit replacement parts as needed right here. Just call for details

Here's What You Do:

1. Install the stations at the 7ft to 15ft intervals 3 or so feet from the foundation wall.
2. Check the new stations for activity 30-45 days after installation.
3. Then monitor termite activity at proper intervals (usually every 90 days).
4. Replace *inspection cartridge* with *bait cartridge* when termites are present in stations.
5. Purchase replacement items as you exhaust your supply.
6. Continue this process keeping stations in good operating order.
